

# Save Money and Energy While Enhancing Your Milk Quality

Use your existing water supply to reduce refrigeration costs with a Mueller® Accu-Therm®

- Accu-Therms are available in a variety of sizes to suit your dairy's needs — whether it's large or small.
- Saves up to 50% on energy costs by using tap or well water to precool milk.
- Type 304 stainless steel end frames and stainless steel compression bolts.
- Type 316 stainless steel plates. Top-quality plate material for sanitary milk contact surface.
- Cools milk down to 37°F (2.8°C) in less time. Maintains high milk quality and impedes bacteria growth.
- Clean-in-place system helps keep maintenance low.

## Now That's Cool!
