

# The **COOLEST** Chiller in the Industry

Our falling film chiller will cool fluids to within 2° of their freezing point without concern of chiller damage.

8-plate pan design increases chiller capacity without increasing the size or cost of the cabinet.

Fully enclosed to ensure your product is free from airborne particles.

Easy to clean and inspect with virtually no downtime for maintenance.

Designed chilling capacity of 20 through 1,000 tons using any available refrigerant.

Unit reduces chilling time, increases production, and brings a faster return on your investment.

Patented Mueller® Temp-Plate® design eliminates potential chiller freeze-up and requires 8 to 10 times less refrigerant charge than other chillers.
